

MINUTES OF GROUP MEETING

UNIT: ICS 4111 – Embedded Systems and IoT

PROJECT: Semester Project Deliverable I

DATE: 3rd June 2025

MODE OF MEETING: Group Discussion and Project Planning

ATTENDANCE

The following members were present during the discussion:

1. Elijah Njugi
2. Sharon
3. Billiart
4. Kevin
5. Samson
6. Grace

AGENDA

1. Review Deliverable I requirements.
2. Confirm the assigned flower.
3. Allocate project tasks among group members.
4. Agree on submission timelines.

MINUTES

1. Review of Deliverable I Requirements

The group reviewed the instructions for Semester Project Deliverable I for the Embedded Systems and IoT project. Members discussed the requirements and the expected deliverables, including environmental research, component research, schematic development, documentation, and final submission.

2. Confirmation of Assigned Flower

During the discussion, Elijah sought clarification regarding the flower assigned to the group. Grace confirmed that the group had been assigned Daisy flowers. The members agreed to proceed with research and design activities based on Daisy growth requirements.

3. Task Allocation

To ensure equal participation and timely completion of Deliverable I, members voluntarily selected the sections they wished to handle. The following responsibilities were agreed upon:

Member	Assigned Task
Sharon	Research on Daisy environmental requirements
Billiart	Research on ESP32, DHT22 sensor, and soil moisture requirements relevant to Daisy growth
Kevin	Research on MQ-5 sensor, OLED display, and Relay module
Elijah	Development of Schematic Designs A and B
Samson	Development of Schematic Design C and review of diagrams
Grace	Compilation of documentation and final submission

4. Submission Timeline

The group agreed that all members would complete and submit their assigned sections by Tuesday at 3:00 PM to allow sufficient time for compilation and review before submission.

RESOLUTIONS

The following resolutions were agreed upon:

1. The project would focus on Daisy flower growth monitoring.
2. Work would be divided among all six members.
3. Every member would complete their assigned section independently.
4. All contributions would be submitted by Tuesday at 3:00 PM.
5. Grace would compile the final document for submission.

ACTION ITEMS

Member	Deliverable
Sharon	Daisy environmental research
Billiart	ESP32, DHT22, and soil moisture research
Kevin	MQ-5, OLED, and Relay research
Elijah Njugi	Schematic Designs A and B
Samson	Schematic Design C and diagram review
Grace	Documentation compilation and submission

MEETING ADJOURNMENT

The discussion concluded after all members had selected their tasks and agreed on the submission timeline.

APPENDIX A: EVIDENCE OF COLLABORATION

The following pages contain WhatsApp group screenshots showing:

- Project discussions and planning.
- Allocation of tasks among members.
- Progress updates.
- Submission of completed work by each member before the agreed deadline.
